

Discover Gold Springs Resource Corp

A Large Gold Project of nearly **8,000 ha** located in **USA** (Nevada and Utah).

One Corporate Objective: Rapidly develop a **Multi-Million Ounce Gold Deposit** and secure the **Large-Scale Operating Mining Permit**.

+1 Million Ounces (M&I) Resource, wide open to expansion across 6 targets and 27 high-potential targets – all within only **40% of the Property**.

4 Historic High-Grade Mining Districts in operation until World War II.

+30 Million USD already spent by the Company.

The management and the board hold **20% of the shares** (fully diluted).

Five Important Positive Points

1. Huge Growth Potential in an Excellent Mining Jurisdiction:

- One large 8000 ha in USA (Nevada & Utah)
- +1 million oz M&I resources wide open for expansion
- 27 targets with substantial potential.

2. All the needed infrastructures are in place

(water rights 600 gallons per minute, roads, rail line and power not far).

3. No Royalties or Streaming agreements

(except for 3% NSR on a small private land representing -3% of the existing resource).

4. Advancing the Mining Permit in parallel of resource expansion

(EA completed in both Nevada and Utah, a private land to simplify permitting).

5. Unique Financial Instrument to advance the project by giving investors the opportunity to invest In Gold Springs with a guarantee.

1 Located in USA, on the border of Nevada and Utah, One of the Best Mining Jurisdictions in the World

- **In one of the world's largest gold region**
with an annual production of nearly 5 million ounces, 31 producing mines of 18 companies like Barrick, Newmont, Kinross, Coeur, SSR, etc.
- With **all the needed infrastructures nearby**
(water rights 600 gallons per minute, roads, rail line and power not far).
- With **a private land** for the processing infrastructure, providing strategic advantage in the permitting process.
- **Low political, cultural or environmental risks.**

2 A Large Gold Project with Significant Growth Potential

- **Nearly 8000 ha with 4 Historic High-Grade Mining Districts.**
- **6 targets with substantial M&I resources wide open for expansion** and covering **only 15 %** of the property. and **27 other targets** with significant potential.

3 Significant Economic Potential

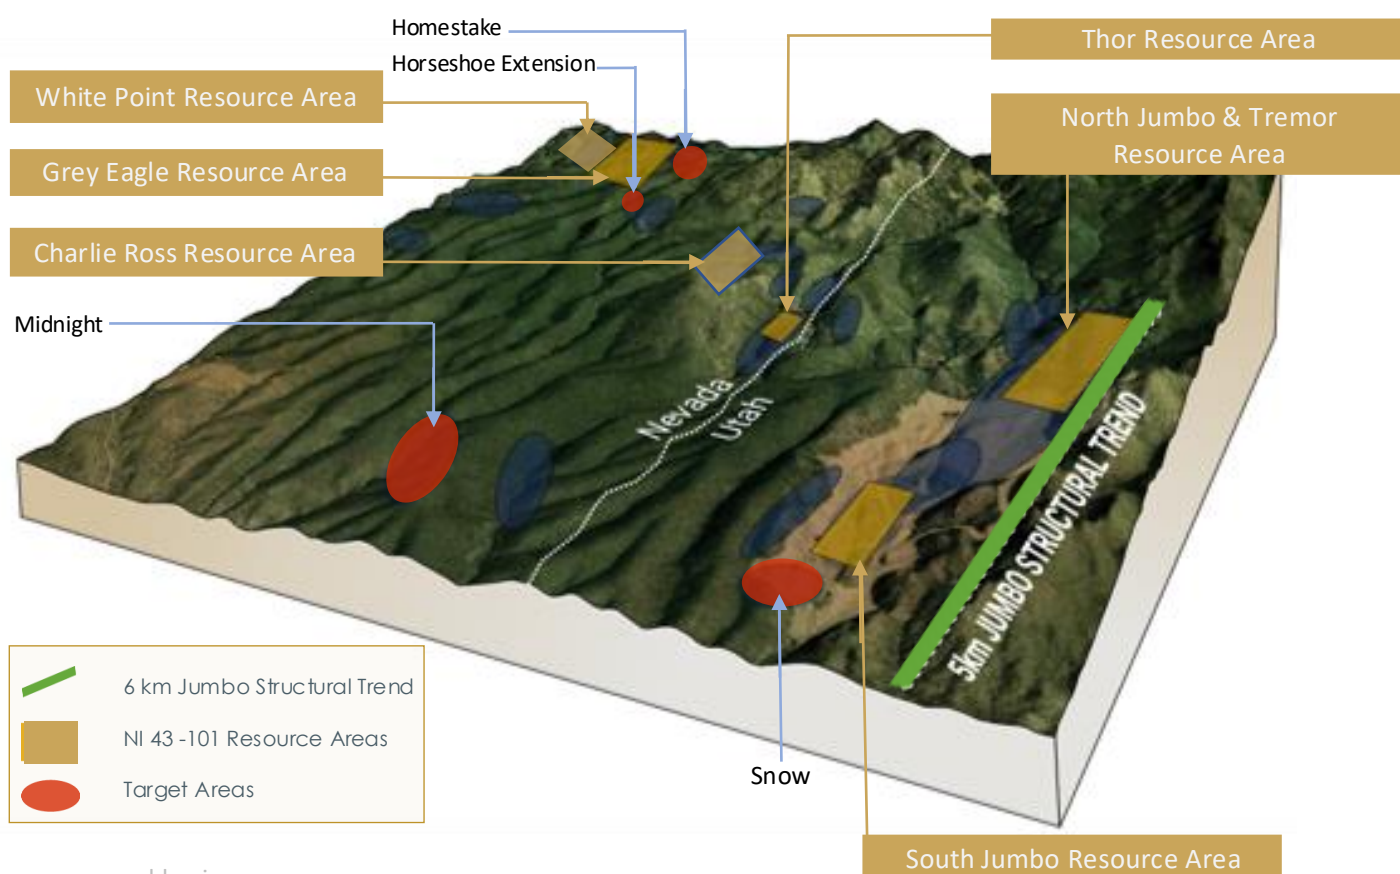

- The resources all outcrop or are near the surface and could be extracted by **low-cost open pit mining** and **a heap leach operation**. A low stripping ratio allows a low mining cost, coupled with heap leach low processing cost for gold extraction, resulting in favorable economics and a low AISC (All In Sustaining Costs).
- **A Low per Ounce Discovery Cost: \$11 in total**
(in 2021, \$9 after deduction some fixed expenses) .
- **No Royalties or streaming agreements**
(except a 3% NSR on a small private land representing less than 3% of the resource).
- **Low annual administrative expenses of \$700,000.**
- **The Management and the Board hold 20% of the shares.**

Exploration Activities at Gold Springs

Since 2010, the Company has already spent +\$30 million and has completed or collected:

- 443 drill holes for a total of 79,733 meters
- 77 line km of CSAMT geophysical survey covering most of the 33 targets
- 470 line km of ZTEM geophysical survey
- 3,420 rock samples, 2,182 soil samples and 912 sediment samples
- Detailed mapping on 33 different targets.
- Cultural clearance on 27 targets.
- Environmental Assessment in both Nevada and Utah

One Corporate Objective

Our goal is to rapidly develop a multi-million ounces deposit and obtain the necessary mining permits.

To achieve this objective, the Company has :

- **Created a new and unique financial instrument.**
to rapidly advance the project by giving investors the opportunity to invest In Gold Springs with a guarantee
- **Minimized all administrative expenses.**
95% of the financing must be exclusively spent on exploration and to increase the Company's value.
- **Advanced the mining permit process.**
